

COVER LETTER – STELLAN LINDELL

When I became 8, I got my first computer from my dad. We helped eachother to build it together from all parts and since then have I always tinkered with computers.

I've always had an ease in learning new things and I like alot to realize my ideas.

In high school I did a work in the course "Project work" and got the idea to build a computer with water cooling and remote start, ie you start the computer with a remote controler.

It was very successful and instructive, and I received the highest rating.

I have also on several occasions in recent years worked with some volunteer and nonprofit projects. One of these was the summer of 2009 when I helped my brother, Patrik, to get a good website (PatrikLindell.se) to promote his work as a art director.

I like getting to know new people and I consider myself to be very social and extrovert.

I often help my friends and familymembers with their computer problems and that is something I think is very inspiering and instructive.

Problem solving is something I'm good at and it's among the best things I know.

It is not often problems are easy to solve, but that's what makes it so fun!

If you want to know more about me so do not hesitate to contact me via email or telephone.

Sencerly
Stellan Lindell
